

UiPath™ Automation Hub

Discover and manage automation opportunities in one place.

Automation Hub helps you centrally manage the automation opportunities pipeline, increase your automation program's ROI by better prioritizing automation ideas, and broaden the availability of your automations.

Automation Hub fosters an open, transparent, and collaborative automation community

 Enterprise Community Workspace

 Automation Store

 Automation Opportunities Pipeline Management

 Automation Discovery Integrations

Turn great ideas from anyone into great automations for everyone

Enterprise Community Workspace

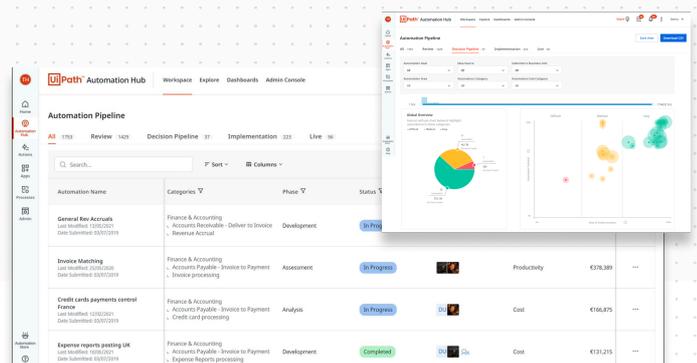

Capture and collaborate on automation opportunities

- Connect to submit automation ideas and share process documentation
- Enable collaboration between SMEs, developers, and the CoE to accelerate the automation projects development

Automation Opportunities Pipeline Management

Centrally manage your automation ideas

- Track automation opportunities in a single location—whether they are from Business Users, Citizen Developers, CoE, or scientifically discovered via Process Mining and Task Mining solutions
- Customize idea assessment to prioritize opportunities based on KPIs that matter to your company—maximizing for business impact

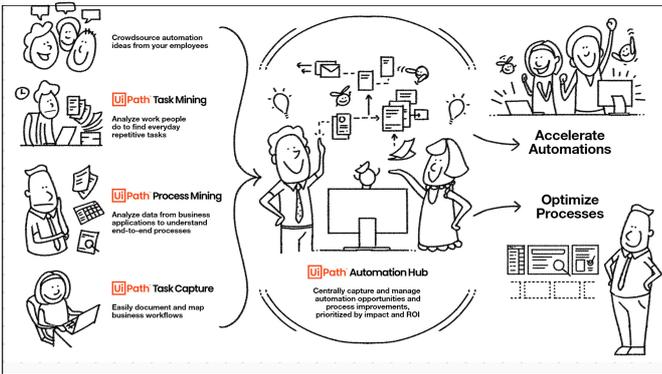

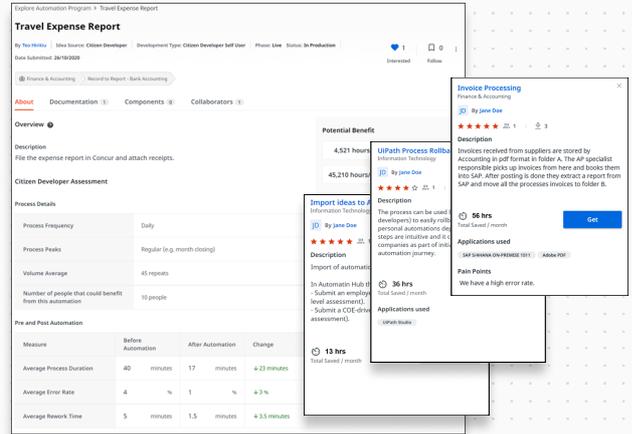

Automation Store

Centralized location to publish, discover, and download your organization's ready-to-go automations

- Users can easily access an overview of each automation, download, and add their review
- The CoE has full control over the Automation Store and the user's experience—including access, views, and available actions

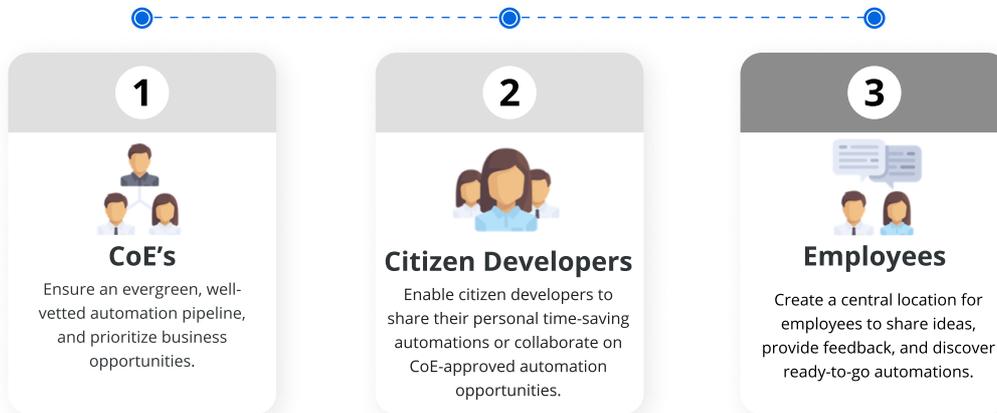

Automation Discovery Integrations

Centrally capture and manage automation opportunities and process improvements, prioritized by impact and ROI

- **Process Mining and Task Mining Integrations:** Expand your automation pipeline by submitting automation ideas directly to Automation Hub
- **Task Capture Integration:** Document and record processes to accelerate automation development

Who is Automation Hub for?

Create, manage, and govern your enterprise-ready automation program.

Start with **Automation Hub** to discover, prioritize, and track automation ideas in a central location.

Leverage **Task Capture** (included), **Task Mining** and **Process Mining** to further enrich your automation opportunities pipeline.
